CH34X USB-SERIAL DRIVER INSTALLATION INSTRUCTIONS

Version: V1.0

Copyright (C) Jiangsu Qinheng Co., Ltd.

Support System:

OS X 10.9 and above

Installation Process:

unzip the file to a local installation directory Double-click CH34x_Install.pkg Install according to the installation instructions Restart after finishing installing

After the installation is completed, you will find serial device in the device list(/dev/tty.wchusbserial*), and you can access it with serial tools.

If you can't find the serial port, you can follow the steps below:

1. Open terminal and type 'ls /dev/tty*' and then you will see devices like tty.wchusbserial;

2. Open 'System Report'->Hardware->USB, the right side is "USB Device Tree" there will be device named "Vendor-Specific Device" and check if the Current is normal.
